Dog River

In 2015, Goodwyn, Mills and Cawood (GMC) was contracted to develop a comprehensive Watershed Management Plan (WMP) for the greater Dog River Watershed.

The purpose of the plan is to guide watershed resource managers, policy makers, community organizations, and citizens to protect the chemical, biological, and cultural integrity of the greater Dog River Watershed, and specifically its waters and habitats supporting healthy populations of fish, shellfish, and wildlife and providing recreation in and on these waters of coastal Alabama. This plan was completed in 2017 and is available to view or download by clicking the links below under Final
