Torre Sevilla will open its green roofs from Autumn 2023

By Sevilla21 (<https://www.sevilla21.es/author/sevilla21/>) 1 year ago

The Torre Sevilla complex, comprising an office building, hotel, shopping centre and Caixaforum, will add another attraction in the coming months, as Caixabank has obtained a municipal building permit from Seville City Council to undertake the project to adapt the green roofs for outdoor events. This project will enhance the landscaped area on the West podium (located parallel to Avenida Inca Garcilaso).

The roofs will be accessible thanks to the extension of one of the elevator cores currently available in the shopping centre. In addition, a new access will be created through one of the pyramidal structures located on the roofs.

The proposal designed by architect José Luis Rodríguez Gil is based on using a core of stairs and elevators already existing in the shopping center to extend it and generate a pedestrian and accessible access to the roof area. At the same time, the project contemplates taking advantage of and redesigning as an access one of the existing emerging elements, a truncated pyramid covered in steel sheeting, which is a nod to the Mauritania pavilion at Expo'92.

The roofs, like the rest of the complex (except for the Caixaforum), were designed by the architectural studio Pelli Clarke & Partners, which had already contemplated this use but did not guarantee universal accessibility to the highest area that will now be provided to the complex. The renovation will be carried out by the architect José Luis Rodríguez Gil.
