

The Environmental Society's Thalangama 2022 Clean-Up Operation - Report

- On the 29th of October 2022, the Environmental Society of CIS in partnership with the "Thalangama Wetland Watch" and students from OSC, conducted a clean-up operation within the 'Thalangama Environment Protection Area'.

It was indeed an arduous task! However, members from our society worked tirelessly and succeeded in cleaning over 5 km of heavily polluted roadside, wetland and the adversely affected, lakeshores of the Thalangama lake.

In total, 7.5 cubic meters of organic, inorganic, industrial and domestic waste was removed, sorted and then handed over to the Kaduwela Municipal Council on the same day by our society! Our members were awarded the **bronze** award for our outstanding commitment and contribution in making this project a success!
